AITA (Advanced Infrared Technology & Applications) 2027

Bridging Science and Industry
in Infrared Thermography

THE CONFERENCE

- Around **200** international **participants**
- Highly specialised **thermography audience**
- **Poster exhibition** and poster slam
- **Industry** exhibition
- Social events and **networking**

The joint AITA & Thermo conference brings together the international community of infrared thermography and combines **scientific innovation with industrial application**.

For 3.5 days, researchers, developers, manufacturers and users will meet to exchange knowledge, present new technologies and build new connections.

Meet the Thermography Community

The AITA 2027 exhibition brings together **manufacturers, technology providers and service companies** with an international audience of researchers, developers and users of infrared thermography.

Present your **technologies, solutions and expertise** directly to the community and use the exhibition as a space for professional exchange, demonstrations and new connections.

Your exhibition stand

6 m² exhibition space including:

- Table, chair and power connection
- Company presentation on the conference website
- 1 complete conference ticket including social programme

EXHIBITION

Limited exhibition spaces available

Book your stand

Be visible where thermography meets practice

Want to do more than exhibit?

With an **Industry Partnership**, you can **extend your presence** before and during the conference and connect your company with the AITA 2027 programme and community.
